

At [VinlyRecycling.com](https://VinlyRecycling.com), our expertise lies in the advanced recycling of PVC. Enclosed you will find a sample of micronized cushion flooring, a substance that complies with the European REACH regulations.

It is a completely pure dry mixture that has versatile applications. Our facility in Lelystad, The Netherlands, is dedicated to collecting, cleaning, and recycling this material.

If this source aligns with the requirements of your product, we would be pleased to discuss the potential for a continuous supply of this specific resource.

With my best regards,

Ivo Besselsen
